temperature/single  
door version blue.  
Customisable parts  
in champagne handle  
(pos.3)

11

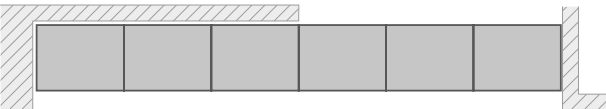

Luxury... "Design your space"

Blue always finds its own space within the room, perfectly integrated into the context in which it works. You can place it wherever you want because it gives you endless possibilities of design.

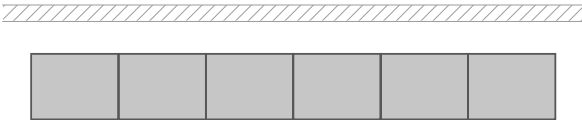

In the picture above you can see a composition of three cases of blue t+ in a customized site.

This layout created using BLUE is based on the typical divisions of movable walls. Light, transparent glass is used to divide and bring together at the same time.

This idea for a layout using blue creates an architectural concept that makes it possible to divide a room into different areas, while still maintaining a strong sense of unity overall, thanks to the transparent glass doors.

Maximum design versatility achievable with BLUE. The refrigerated cabinet becomes an architectural feature of the premises

14

Refrigerated double door version Fully customizable with as shown Bronze Handles pos.1)

Shop design that becomes a showcase: a feast for the eyes that anticipates the feast that we create for your taste. buds.

15

16

Focus on just
