

DESIGNS Synthesis 2

Innovative system of modular units to produce and store Gelato in front of your customers

Synthesis 2: The innovative system of modular units to fully satisfy your needs.

Each module consists of two cylinders. Every module independently produces and stores gelato.

Furthermore, each cylinder has its own consistency and storage temperature settings to best produce every single flavor.

Create your shop by combining the vertical and horizontal Synthesis 2 modules

- 1. **Produce the highest quality Gelato right in front of customers**: You can pasteurize and Batch Freeze in the same cylinder.
- 2. **Static Storage**: Store the Gelato in the same cylinder it was produced in. Each modular unit's storage temperature can be adjusted and will remain constant to best maintain the Gelato.
- 3. Serve customers freshly made Gelato: Your freshly made Gelato is ready to serve right away. There is no need to extract and blast freeze it, and there is no thermal shock thanks to **static storage**.

Synthesis 2

> PERFORMANCE AND QUALITY

The simplest way to make the highest quality Gelato

	Gelato and Sorbet	Pour the liquid directly into the cylinder, choose the dedicated program cycle and transform the mixture into Gelato or Sor- bet. Upon completion, the Gelato or Sor- bet will go into static storage at its optimal temperature.
0	Gelato Hot	Gelato Hot : the mix is prepared direct- ly in the batch freezer, where it is heated, pasteurized, and transformed into gelato, and statically stored at the optimal tem- perature.
	Gelato Hot Age	Gelato Hot Age : the mix is prepared, pasteurized, and aged, then turned into gelato, and statically stored at the optimal temperature.
	Gelato Hot&Cold	Gelato Hot&Cold : to heat and cool the mix and then turn it into gelato, and statically stored at the optimal temperature.
	Sicilian Slush	The beater spins at low speed to produce perfect coffee, lemon, and fruit slushes without any emulsions, just like the tradi- tional recipe.
	Fruit Cremolata	The program uniformly and perfectly crys- tallizes water, fruit, and sugar into a fresh, delicious, thirst-quenching treat.

> PERFORMANCE AND QUALITY

3 simple steps to make your freshly made artisan Gelato

Pour the chilled mix into the cylinder;

Press the Production button choosing the desired cycle;

Teorema Read

Once the optimal consistency has been reached, the Gelato is ready to be served, you do not need to extract it because it is already stored inside the cylinder.

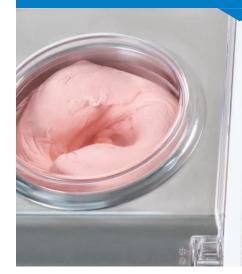

Hard-O-Tronic®

The exclusive system for an excellent gelato. The status of the Batch freezing cycle is constantly displayed on the LCD display. The user can always change the gelato consistency using the arrow buttons to obtain the ideal Gelato or Sorbet.

Static Storage. At the end of the batch freezing cycle, the Gelato is automatically stored inside the cylinder and ready to be served. There is no need to extract into another container and blast freeze it since there is no thermal shock.

The ideal storage temperature for each flavor can be independently set and adjusted at any time.

> PERFORMANCE AND QUALITY

Independent refrigeration system and user interface. Synthesis 2 consists of 2 completely independent cylinders. Different consistencies and storage temperatures can be set for each cylinder.

Beater

The unique beater design was created to easily allow serving of the Gelato. The beater with a lowered central shaft is equipped with 2 interchangeable self-adjusting scraping blades, ideal for constant cleaning and cylinder performance.

Synthesis 2 is available in two different models to satisfy any space requirements: **horizontal and vertical**.

Modularity. Modular technology allows you to mix and match the different models to adapt and enhance the layout of any location.

Advanced refill

When only a small quantity of Gelato is left in the cylinder the operator can refill the cylinder with a needed quantity of liquid mix and restart the batch freezing cycle.

> CONVENIENCE

The Thermoplastic Lid is ergonomic and light. Customers can see the Gelato through the lid during production and storage. While in the closed, the lid protects the refrigerated spatula. When using the Horizontal version of Synthesis 2, the lid becomes a **convenient service surface**, where Gelato cups can be placed, and served to customers.

The lid is also designed to stay open and give the optimal amount of space to the operator.

Refrigerated scooper holder with separate compartments, ensures the utmost hygiene and can hold the spatula or scooper when not in use.

LCD display. Allows the operator to know the operational status of each cylinder at any time. During the batch freezing process the screen will show:

1. The name of the selected program; 2. The current consistency; 3. The final consistency, which can be modified even during batch freezing; 4. The modifiable storage temperature; 5. The speed of the agitator that can also be adjusted.

Wheels

The unit wheels are easily installed and allow for easy movement of the unit.

Scan the **QR Code** on the front of the machine to access the most up to date equipment information: Instruction Manual, Carpi Care kit & Carpi Clean kit.

SAVINGS

Energy savings thanks to the **high** efficiency electric motors and high performance capacitors.

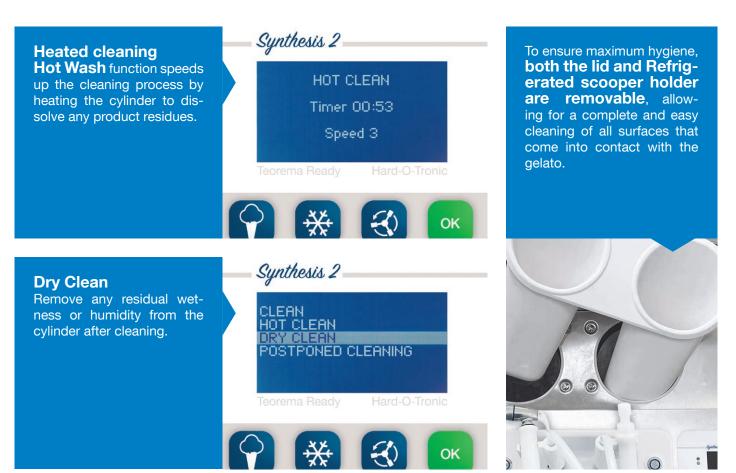

More operational safety and more control during production.

HYGIENE

The **delayed cleaning program guarantees hygiene** by controlling the temperature of the cylinder once the gelato has been extracted. So immediate washing of the machine is not necessary in the event of prolonged work stoppages.

Each 2-cylinder module is equipped with a **wash kit** consisting of a handheld shower and liquid aspirator with an integrated pump and filter. This facilitates cleaning operations inside the cylinder. Both accessories are equipped with a quick coupling.

Carpi Care kit

request them from your dealer to always keep your machine hygienically perfect.

Technical Specifications

	Cylinder capacity	Electrical Supply		Max fuse size	Minumun Circuit Ampacity	Condenser	Dimension	Net Weight	
	min - max Ib (kg)	Volts	Hz	Ph	Amps			W x D x H in (cm)	lb (kg)
Synthesis 2 V vertical	3.5 (1.5) 5.5 (2.5)	220	60	1	13	13	Water	17.7 x 34.6 x 39.4 (45 x 88 x 100)	397 (180)
